Guidance on social distancing for everyone in the UK and protecting older people and vulnerable adults – Gov.UK – Published 16th March 2020:

Social distancing measures are steps you can take to reduce the social interaction between people. This will help reduce the transmission of coronavirus (COVID-19).

They are:

1. Avoid contact with someone who is displaying symptoms of coronavirus (COVID-19). These symptoms include high temperature and/or new and continuous cough.
2. Avoid non-essential use of public transport, varying your travel times to avoid rush hour, when possible.
3. Work from home, where possible. Your employer should support you to do this. Please refer to [employer guidance](#) on the Government website for more information.
4. Avoid large gatherings, and gatherings in smaller public spaces such as pubs, cinemas, restaurants, theatres, bars, clubs.
5. Avoid gatherings with friends and family. Keep in touch using remote technology such as phone, internet, and social media.
6. Use telephone or online services to contact your GP or other essential services.

Everyone should be trying to follow these measures as much as is pragmatic.

For those who are over 70, have an underlying health condition or are pregnant, we strongly advise you to follow the above measures as much as you can, and to significantly limit your face-to-face interaction with friends and family if possible.

This advice is likely to be in place for some weeks.
